2008 Color Orthophoto
Columbia, CT

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, leaf-on, 0.39 inch (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. The maintainable mosaic is
not color balanced so visual imbalances between individual
input images are preserved. This will create differences in the
range and intensity of colors depending on the area viewed.
The location and shape of features in other GIS layers will not
exactly match information shown in the aerial photography
primarily due to differences in spatial accuracy and data
collection dates. Street-level data such as major interstates, US
routes, state routes, streets, railroads, and ferry crossings
are displayed yet may not match the locations of such features on
the orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic locations and nameborhoods are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the
USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on USGS 1:24,000 scale and displays geographic names, places and
their associated towns, boundaries, highways, and waterbodies. This map data is neither current nor
complete. Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
