This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.39 feet (1 meter) aerial survey taken on July 3rd, 2008, 2016, and 2018. The statewide mosaic is not color balanced so color imbalances between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USGS of the US Forest Service through the National Photographic Field Office in Salt Lake City.
BASE MAP DATA - All data is based on LIDAR data and displays geographic names, places and their symbols, states, boundaries, counties, and suburbs. This map data is neither current nor complete. Street data is based on Trimble/GIS georeferenced data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital image data shown on this map.
