This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, 3.79 feet (1 meter) aerial survey taken on July 3rd, 10th, 14th, and 19th. The statewide mosaic is not color balanced so color imbalances between individual input images are not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP), is provided by the USDA National Agricultural Imagery Program (NAIP), 2008 Color Orthoimage, National Agricultural Imagery Program, June 10, 2008.
BASE MAP DATA: All data is based on 1:24,000 scale topographic maps published by the USGS in 1995. Street Centerline data is not current and cannot be used for navigation.
MAPS AND DIGITAL DATA: Visit the CT DEP website for the map and a variety of others in PDF format. Use the CT DEP website to download the base map digital spatial data shown on this map.

EXPLANATION
Importantly, geographic locations and waterbodies are labeled.
