This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf-on, 1:385,000 (1 meter) aerial survey taken on July 7th, 8th, 16th, 19th, and 22nd. The orthophotography is not color balanced so visual imbalances between individual input images is not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, county routes, state routes, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USGS of the US Department of Interior through the NAIP Program Office at Heal Park, CO.
BASE MAP DATA - All data is based on USGS 7.5' quadrangles and depicts geographic names, places and their symbols, town boundaries, airports, and highways. Some base data is neither current nor complete. Street data is based on the Intelex/Esri-sourced data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital ortho data used on this map.
