2008 Color Orthophoto
New Haven, CT
(East)

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false color, 1.59 feet (1 meter) aerial survey taken on
July 4th, 10th, 16th, and 18th. This statewide product is a
natural color balanced so visual similarities between individual
input images is not assured. This will create differences in the
color and intensity of colors depending on the area viewed.
The location and shape of features in other GIS layers will not
exactly match information shown in the aerial photography
primarily due to differences in spatial accuracy and data
collection dates. Street-level data such as major interstates, US
routes, state routes, streets, railroads, and ferry crossings are
displayed yet may not match the locations of the features on
the orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic features and geographical are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the
USDA/Agricultural Stabilization and Conservation Service.
BASE MAP DATA - All data is based on U.S. GS products and depicts geographic features, places and
their relationships to land boundaries, city limits, and other base map data in various formats, or
compliant. Street data is based on Telos/Inagraphics data.
MAPS AND DVR DATA - Use the CT DCR website for this map and a variety of others in PDF format.
Visit the CT DCR website to download the base map digital orthophoto data on this map.
