This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false color, 1:39 (1 meter) aerial survey, taken on July 9th, 10th, 11th, 14th, and 19th. The map shows only land
features, no color balancing, as pixel imbalances between different input images is not corrected. This may cause differences in
the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not
exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data
collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are
displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals,
educational facilities, transit stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the
USDA's Farm Service Agency through the National Photographic Laboratory (NPL). The map data is
not colorfast. Map is not colorfast.
