2008 Color Orthophoto
Winchester, CT
(East)

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf-on, 3.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. The statewide mosaic is not color balanced so tonal imbalances between individual input images is not screened. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the National Agricultural Imagery Program Office in St Louis, MO.
BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, places and their locations, water boundaries, roads, and railroads. Base map data is neither current nor complete. Street data is based on TeleAtlas™/MapData™
MAPS AND DIGITAL DATA: Visit the CT DNR website for this map and a variety of other in RFP format. Visit the CT DNR website to download the base map digital orthophoto data on this map.

Map prepared by CT DNR, December 2010. Map is not colorfast. Protect from light and moisture.
