2008 Color Orthophoto
Enfield, CT

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false color, 1.39 foot (41 cm) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. The statewide mosaic is
not color balanced so local imbalances between individual
input images are not corrected. This will create differences in the
range and intensity of colors depending on the area viewed.
The location and shape of features in other GIS layers will not
exactly match information shown in the aerial photography
primarily due to differences in spatial accuracy and data
collection dates. Street-level data such as major interstates, US
routes, state routes, streams, railroads, and ferry crossings are
displayed yet may not match the locations of such features on
the orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the National Photogrammetry Field Office in Salt Lake City.
BASE MAP DATA: All data is based on 1:4000 scale and displays geographic features, places and their symbols, towns, boundaries, waterbodies, and railroads. Data map data is neither current nor complete. Street data is based on 1:4000 orthophotography data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital orthophoto data on this map.
