2008 Color Orthophoto
Essex, CT

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, leaf on, 1:39 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 30th. The statewide image is
not color balanced so visual imbalances between individual
input images is not removed. This will create differences in the
range and intensity of colors depending on the area viewed.
The location and shape of features in other GIS layers will not
exactly match information shown in the aerial photography
primarily due to differences in spatial accuracy and data
collection dates. Street-level data such as major interstates, US
routes, state routes, streets, railroads, and ferry crossings are
displayed yet may not match the locations of such features on
the orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program, (NAIP), is provided by the
USDA's Farm Service Agency through the National Photographic Field Office in Portland, OR.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic features, places and
their attributes, town boundaries, airports, and railroads. This map data is neither current nor
compatible. Street data is based on Trove's digitally captured data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in
PDF format. Visit the CT ECO website to download the base map digital orthophoto data shown on
this map.
