This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.79 feet (1.15 m) aerial survey taken on July 3rd, 10th, 15th, 16th, and 19th. The orthophotography is not color balanced so normal discrepancies between individual input images are not corrected. This may create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, county roads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and landmarks are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP), is provided by the USDA of the Natural Resources Conservation Service through the National Agricultural Imagery Program Field Office in Salt Lake City, UT.
BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, places and other information from boundaries, counties, and other. These map data is neither current nor complete. Street data is based on LIDAR/orthophotography data.

MAPS AND DIGITAL DATA: Visit the CT DEP website for the map and a variety of other data in PDF format. Visit the CT DEP website to download this map digital orthophoto data shown on this map.
