This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.78 feet (1 meter) aerial survey taken on July 3rd, 1996, 1998, and 2002. The statewide mosaic is not color balanced so visual similarities between individual input image is not guaranteed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as street names, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USGS of the Department of the Interior through the National Agricultural Imagery Program Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1/548,000-scale and displays geographic names, places and their symbols, town boundaries, shopping, and railroads. Base map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.
MAPS AND DIGITAL DATA - You can use the CT DPO website for this map and a variety of others in the form. Visit the CT DPO website to download the base map digital眺ured data shown on this map.

EXPLANATION
2008 Color Orthophoto Middlefield, CT

Map prepared by CT DPO, December 2018
Map is not colored.  Product Level Slight and restriction.
