2008 Color Orthophoto
North Haven, CT

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.59 ft (1 meter) aerial survey taken on July 5th, 10th, 15th, 19th, and 28th. The multispectral mosaic is not color balanced as usual imbalances between individual input images are not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, U.S. routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the United States Department of Agriculture through the Natural Resources Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 5'USGS data and displays geographic names, places and their symbols. All boundaries, edges, and waterbodies. Data map data is neither current nor complete. Street data is based on the USGS orthophotography data.
MAPS AND DIGITAL DATA - Visit the CTDEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital aerial data shown on this map.
