This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.79 feet (1 meter) aerial survey taken on July 3rd, 10th, 14th, 15th, and 16th. The available coverage is not color balanced so visual similarities between individual input images is not ensured. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, county routes, state routes, and town roads are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), as provided by the USDA of any Service Agency through the Natural Resources Photographic Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and depicts geographic features, places and their boundaries, water boundaries, and railroads. This map data is neither current nor complete. Street data is based on false color orthophotography.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others from USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
