This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf on, 3.79 feet (1 meter) aerial survey taken on July 3rd, 15th, 19th, and 24th. The entire mosaic is not color balanced so small imbalances between individual input images is not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the National Agricultural Imagery Program (FAIR) Office in Salt Lake City, Utah.
BASE MAP DATA - All data is based on 1:100,000 scale and depicts geographic names, places and their symbols, county boundaries, airports, and railroads. This map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.
