This map displays the 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 0.61 meters (1 foot) aerial survey taken on July 3rd, 10th, 11th, 14th, and 15th, 2008. The statewide mosaic is not color balanced so visual differences between individual input images are not preserved. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA of Farm Service Agency through the Aerial Photography Field Office for South Lake US.

BASE MAP DATA - All data is based on USGS quadiles and displays geographic names, places and other minor civic, state boundaries, airports, and railroads. These data are not colorfast and are not complete. Street data is based on telephone company data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Use the CT DEP website to download the base map digital orthophoto data used on this map.

Map prepared by CT DEP, December 2010. Map is not colorfast. Printed copy not guaranteed.
