This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf on, 3.79 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, 16th, and 19th. The statewide mosaic is not color balanced so tonal imbalances between individual input images are apparent. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features is other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streams, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USGS of Fort Belvoir, Agency through the Agricultural Photo and Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and other graphical elements, boundaries, colors, and symbols. Base map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of other digital data on this map.
