DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the US Department of Agriculture through the National Photographic Field Office in St. Louis, MO.

BASE MAP DATA - All data is based on USGS data and displays geographic names, places and their symbols, towns, boundaries, airports, and railroads. This map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Use the CT ECO website to download the base map digital optical data shown on this map.

EXPLANATION

This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 1:39,000 (3 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. The statewide mosaic is not color balanced so tonal imbalances between individual input images is not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other US layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

Important geographic locations and waterbodies are labeled.
