This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, true color, 3.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, 14th, and 15th. The nationwide mosaic is not color balanced so visual similarities between individual input images is not guaranteed. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, transit stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), as provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on LIDAR data and displays geographic features, places and their symbols, town boundaries, airports, and railroads. These data are in neither current nor complete. Street data is based on available unprocessed data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

EXPLANATION
2008 Color Orthophoto
Mansfield, CT
(Northwest)
Map prepared by CT DEP, December 2010.
