This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, 1:39 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. The statewide mosaic is not color balanced so visual balances between individual input images are not consistent. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, strreets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and river boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USGS of the US Department of the Interior through the National Agriculture Imagery Program (NAIP) in Field Office at State Level/CI.

BASE MAP DATA - All data is based on 1:34,000 scale and displays geographic names, places and their standards, stream boundaries, airports, and railroads. All map data is neither current nor complete. Street data is based on the USGS/USGS orthophotography data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
