This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf-on, 3.79 foot (1 meter) aerial survey, taken on July 3rd, 10th, 11th, 13th, and 19th. The statewide mosaic is not color balanced so tonal imbalances between individual input images are not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP/DATA - All data is based on USGS maps and displays geographic names, places and their symbols, town boundaries, highways, and railroads. These data bases are subject to errors and complete. Street data is based on USGS/USCS orthophotography data.
MAPS AND DIGITAL DATA - Visit the CT Eco website for this map and a variety of others in PDF format. Visit the CT ECO website for this map and a variety of others in PDF format.
