2008 Color Orthophoto
 Killingly, CT
 (South)

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 1.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 14th, 16th, and 18th. The statewide mosaic is not color balanced so visual imbalance between individual input images is not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, and railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USDA, Farm Service Agency through the Agricultural Photography Field Office in East Lake, GA.
BASE DATA - All data is based on 1:24,000 scale and displays geographic names, places and places and their symbols, towns, boundaries, highways, and waterbodies. These base data is neither current nor complete. Street data is based on 1:24,000 orthophotography data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other in DWG format. Visit the CT DEP website to download the base map digital orthophoto data shown on this map.
