2008 Color Orthophoto
Danbury, CT
(Southeast)

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, true color (1 m.) aerial survey taken on July 3rd, 10th, 11th, 16th, and 19th. The orthophoto mosaic is not color balanced so visual imbalances between individual input images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed and may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP), is provided by the USGS and distributed agency through the National Photographic Field Office in Salt Lake City.
BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, airports, and railroads. This map data is neither current nor complete. Street data is based on the USGS Orthophoto database.
MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of other in 2009roma. Visit the CT DEP website to download the base map digital dataset on this web.
