EXPLANATION

This map displays 2008 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a non-color, leaf-on, 3.79 feet (1 meter) aerial survey taken on July 3rd, 1986, 1986, 1986, and 1986. The statewide mosaic is not color balanced so visual impressions between individual input images may not be uniform. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed and may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and towns. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) provided by the USGS of the National Geospatial-Intelligence Agency through the National Agriculture Imagery Program (NAIP) at URL /data.naip.gov
BASE MAP DATA - All data is based on USGS data and displays geographic names, places and those symbols, toponyms, boundaries, and waterbodies. Data map data is neither current nor complete. Street data is based on: U.S. Census Bureau TIGER derived data.
