This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf-on, 3.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, and 18th. The statewide mosaic is not color balanced so color imbalances between individual input images are not removed. This will create differences in the range and intensity of colors depending on the area viewed.

The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on U.S.GIS data and displays geographic names, places and their relationships, boundaries, topography, and relief. These base data are neither current nor complete. Street data is based on state/county/ground data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.
