This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 1.39 feet (4 meters) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. The statewide mosaic is not color balanced so tonal imbalances between individual input images are uncorrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USDA National Agricultural Imagery Program (NAIP) and distributed through the USDA Farm Service Agency at no cost.
BASE MAP DATA - All data is based on U.S.G.S. maps and displays geographic names, places and other symbols, town boundaries, airports, railroads. This map data is neither current nor complete. Street data is based on Walk-On's copyrighted data.
MAPS AND DIGITAL DATA - Visit the CT IDES website for the map and a variety of other CT GIS layers. Visit the CT DEP website to download the base map digital ortho data shown on this map.
