2008 Color Orthophoto
Shelton, CT
(Southeast)

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf on 3, 3.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, 12th, and 13th. The statewide mosaic is not color balanced so visual imbalances between individual input images are not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street-level data such as major Interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA, Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1/24,000 scale and displays geographic names, places and their specific times boundaries, airports, and railroads. This data was derived from overhead, non-color balanced data.
MAPS AND DIGITAL DATA - Visit the CT DCP website for this map and a variety of others at DCP's store. Visit the CT DCP website to download the base map digital topographic data derived on this map.
