DATA SOURCES

This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 1.39 inch (3.5 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. The statewide mosaic is not color balanced so visual similarities between individual input images is not assured. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

EXPLANATION

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Agricultural Field Office in Southbridge, MA.

BASE MAP DATA - All data is based on 1/30,000 scale and displays geographic names, places and their symbols, legal boundaries, airports, and railroads. Data may depict vegetation, land use, and other incomplete Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other maps and digital data. Visit the CT DEP website to download the base map digital spatial data shown on this map.
