This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
color balanced so tonal imbalances between individual
input images is not corrected. This will create differences in the
range and intensity of colors depending on the area viewed.
The location and shape of features in other GIS layers will not
exactly match information shown in the aerial photography
primarily due to differences in spatial accuracy and data

collection dates. Street-level data such as major interstates, US
routes, state routes, streets, railroads, and ferry crossings are
displayed yet may not match the locations of such features on
the orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.

Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program, (NAIP), is provided by the
USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and
their symbols, town boundaries, adjacencies, and relationships. Base map data is neither current nor
complete. Street data is based on 3,000-foot grid and depicts geographic names, places and
their symbols, town boundaries, adjacencies, and relationships. Base map data is neither current nor
complete. Street data is based on 3,000-foot grid and
