This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.79 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, and 16th. The statewide mosaic is not color balanced so small imbalances between individual input images is not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, streams, railroads, and forty crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USGS of the Federal Agency through the NAIP Field Office in each State.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic features such as town boundaries, highways, and rivers. Street names are not included, nor are all complete. Street data is based on state/local geocoded data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT ECO website for this map and a variety of others in PDF format.

EXPLANATION

Map prepared by CT DEP, December 2010. Map is not updated, Product Level Light and moderate.
