This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotographs for the State of Connecticut. It is a normal color, false color, 3.79 feet (1 meter) aerial survey taken on July 3rd, 1999, 1990, and 1980. The resulting mosaic is not color balanced so visual differences between individual input images is not possible. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and waterbodies are labeled.

STATE OF CONNECTICUT

Tolland, CT

EXPLANATION

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA Forest Service Agency through the Information Technology Office at Salt Lake City.

BASE MAP DATA - All data is based on 1:30,000 scale and displays geographic names, places and their affiliations, town boundaries, highways and railroads. This base map is neither current nor complete. Street data is based on local/taxi/county/photographed data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of other map services. Visit the CT DEP website to download the base map digital spatial data shown on this map.
