This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a naked-eye, 3.79-foot (1.2 meter) aerial survey taken on July 3rd, 10th, 15th, and 16th. The statewide mosaic is not color balanced so small imbalances between individual input images are not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography presently due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, U.S. routes, state routes, specific railroad, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA, United States Farsey Agency through the aerial Photographic Field Office at Salt Lake City.
BASE MAP DATA - All data is based on U.S.G.S. maps and displays geographic names, places and their symbols, town boundaries, elevations, and topographical. These map data is neither current nor complete. Street data is based on Gila/Sisor's orthophotographed data.
MAPS AND DIGITAL DATA - Visit the CT DPO website for this map and a variety of other in PDF format. Visit the CT DPO website to download the base map digital orthophotograph data shown on this map.
