This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a "true color" aerial photograph, taken on July 3rd, 10th, 14th, 15th, and 16th. The color balance is not colorfast so tonal imbalances between individual input images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, U.S. routes, state routes, streets, and major crossroads are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USDA Forest Service Agency through the Spatial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on U.S.GS data and displays geographic names, places and their coordinates, town boundaries, elevations, and waterbodies. Base map data is neither current nor complete. Street data is based on map/land ownership data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other GIS datasets. Visit the CT DEP website to download the base map digital orthophoto data for this map.
