This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf-on, 0.79 foot (0.24 meter) aerial survey taken on July 3rd, 2008, 2009, 2010, and 1998. The statewide mosaic is not color balanced so visual contrasts between individual input images is not constant. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, individuals, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

**DATA SOURCES**

**ORTHOPHOTOGRAPHY** - National Agricultural Imagery Program (NAIP), provided by the USDA's Farm Service Agency through the National Agriculture Imagery Field Office in Salt Lake City.

**BASE MAP DATA** - All data is based on 1:4900 scale digital geographic coverage places and their symbols, town boundaries, etc.

**MAPS AND DIGITAL DATA** - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital layered data shown on this map.
