This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false on, 3.79 foot (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 19th. The southeast region is not color balanced as usual imbalance between individual input images is not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the National Photograpy Field Office in Fort Belvoir, VA.
BASE MAP DATA - All data is based on USDA data and displays geographic entities such as places and their symbols, roads, boundaries, airports, and railroads. This map data is neither current nor complete. Street data is based on USDA/USGS orthophotography data.
MAPS AND DIGITAL DATA - Visit the CT DEC website for this map and a variety of others in PDF format. Visit the DEC website to download the base map digital spatial data sheets on this map.
