This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken on July 2nd, 2008. The data are the result of an advanced aerial survey process to produce near-infrared digital orthophoto products for agricultural purposes.

The statewide mosaic is not color balanced so tonal conditions as well as supporting identification and mapping of habitat features will not exactly match information shown in the aerial photo. Areas can appear different in color on the mosaic as opposed to the original aerial photo taken. Also, values will be different for areas that are not contained in the mosaic due to spatial differences between input images.

The map is not colorfast. The map, like all color-based maps, is intended for use in printed form and for display on computer monitors. It has been prepared to protect from light and moisture.

EXPLANATION

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

DATA SOURCES

ROAD MAP DATA - All data is based on 1:24000 scale and displays geographic names, places and their boundaries, towns, highways, county, and school information. This map data is neither current nor complete. Street data is based on TeleAtlas proprietary data.

MAP AND GRAPHIC DESIGNS - Visit the CT DEP website to download the base map digital spatial data shown in this map.
