DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program, (NAIP) is provided by the USDA’s Farm Service Agency through the Joint Photographic Intelligence Office, U.S. Army, Ft. Belvoir, VA.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, rivers and roads. Base map data is derived from current, non-topographic data.

MAPS AND DIGITAL DATA - Visit the CT ECO website to download the base map digital data shown on this map.

Map prepared by CT ECO, December 2012. Map is not subject to Patent Law and/or Licenses.

EXPLANATION

This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as mapping distribution and intensity of vegetation. Infrared photography is used extensively in the mapping of areas containing vegetation. The differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street data bases such as major intersections, US routes, state routes, minis, railroads, and city boundaries are displayed but may not match the locations of such features on the ground. Features such as airports, hospitals, educational facilities, town names, and town boundaries. Important geographic locations and waterbodies are labeled.
