2008 Color Infrared Orthophoto
East Granby, CT

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) color infrared orthophotography for the State of Connecticut. It is color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken on July 3rd, 2008. NAIP infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of federal, state, and local geographic features. It is a product of the USDA-NRCS National Agricultural Imagery Program. Differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, minor, railroads, and city boundaries are displayed but may not match the locations of such features on the ground. Some other locations include airports, hospitals, educational facilities, tree canopies, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program, (NAIP) is provided by the USDA's Farm Service Agency through the Federal Photographic Collection in LLC, LLC.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, county boundaries, rivers, and roads. Base map data is neither current nor complete. Street data is based on Telocast copyrighted street data.

MAPPING AND PRINTING NOTE - You can download and print this map in a variety of colors in PDF format. Visit the CT DEP website to download this map digital data shown on this map.
