Map prepared by CT DEP, December 2010. Map is not colorfast. Protect from light and moisture.

EXPLANATION

This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared leaf on, 3.39 feet (1 meter) aerial survey taken on July 3rd, 3th, 14th, 17th, and 24th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions, as well as mapping of habitat features. Tonal differences between individual input images are not correct so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection data. Street-level data such as major interstates, US routes, state routes, minor, railroads, andathy crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, town boundaries, and term boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program, (NAIP), is provided by the USDA Farm Service Agency through the National Photogram Facility in staff labs. (NAIP)
BASE MAP DATA - All data is based on 1"/2,000,000 scale and displays geographic names, places and their symbols, town boundaries, airports, and railroads. Base map data is subject to errors and omissions. This data is based on various copyrighted data.

MAPS AND GRAPHICS DATA - You can use the CT DEP images to download the base map digital data shown on this map.
