This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.29-foot (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions, as well as supporting identification and mapping of habitat and environmental features. Differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, U.S. routes, state routes, minor, railroads, and ferry crossings are displayed but may not match the locations of such features on the aerial photography. Important geographic locations and waterbodies are labeled.

**DATA SOURCES**

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA, Farm Service Agency through the aerial photography NAIP Office in Salem, OR.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, rivers, and waterbodies. Street-level data is based on TeleAtlas copyrighted data.
