2008 Color Infrared Orthophoto
Colebrook, CT
(East)

EXPLANATION
This map displays 2008 National Agricultural Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is color infrared, leaf on, 3.39 foot (1 meter) aerial photography taken on July 3rd, 10th, 14th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat features like waterbodies. Imbalance between individual input images is not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial orthophotography primarily due to differences in spatial accuracy and date collection dates. Street-level data such as major interstates, US routes, state routes, minor roads, and utility lines are displayed but may not match the locations of such features on the base map data. Important geographic locations and waterbodies are labeled. The statewide mosaic is not color balanced so tonal imbalances between individual input images is not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial orthophotography primarily due to differences in spatial accuracy and date collection dates. Street-level data such as major interstates, US routes, state routes, minor roads, and utility lines are displayed but may not match the locations of such features on the base map data. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency. Orthophotography P/D Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, airports, and railroads. Street data is based on TeleAtlas copyrighted data. Data is complete. Street data is based on TeleAtlas copyrighted data.
MAP AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

Map prepared by CT DEP, December 2010.
