This map displays 2008 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39-foot (1 meter) aerial survey taken on July 31st, 2008, 10th, 19th, and 26th. This aerial orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification of non-urban features. Aerial photography differences between individual input images are not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial orthophotography primarily due to differences in spatial accuracy and date collection date. Street-based data such as major interstates, U.S. routes, state routes, minor, railroads, and dry crinolines are overlaid but may not match the location of each feature on the orthophotography. Street names, parks, public recreation centers, hospitals, educational facilities, train stations, and new boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the U.S. Department of Agriculture through the State Photogrammetric Field Office in South Lake City.

ROAD MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, forest boundaries, property, and attributes. Road map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.

LANDFILLS AND DUMPsites - Vector data sources for this map and a variety of others in PDF format. Visit the CT DIGMAP website to download the base map digital aerial data shown on this map.
