This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, 1:30,000 scale aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions, as well as supporting identifications and mapping of features. The orthophotography is produced from multiple aerial passes at the state's expense. Variance between individual input images is not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Metadata by date such as major interstates, US routes, state routes, minor, railroads, and ferry crossings are displayed but may not match the locations of such features in other GIS data sets. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA (USDA) as part of the National Agriculture Imagery Program (NAIP).
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns, boundaries, airports, and schools. Base map data is no longer current or complete. Street data is based on NYS/CT/CT's copyrighted data.
MAP AND PRINTING STATE: - Data by the CT GIS Division in this map and a variety of others in PDF format. Visit the CT GIS website to download the base map digital data shown on this map.
