This map displays 2008 National Agriculture Imagery Program (NAIP) color infrared orthophotography for the State of Connecticut. It is color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken on July 5th, 10th, 11th, 18th, and 19th. This color infrared orthophotography provides many services, such as observing crop and vegetation conditions, as well as supporting identification and mapping of distinct landscape features. The imbalances between individual input images are not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial orthophotography primarily due to differences in spatial accuracy and date collection dates. Minor local data such as major interstates, US routes, state routes, minor railroads, and ferry crossings are displayed but may not match the locations of such features on the OrthoMap. Important geographic locations and landmarks are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the OrthoPhotography Field Office in St. Louis, MO.
ROAD MAP DATA - All roads are based on 1/2,6000 scale and displays geographic names, places and their symbols, town boundaries, airports, and landmarks. Road map data is neither complete nor comprehensive. Road data is based on TeleAtlas copyrighted data.
MAP AND GRAPHIC DESIGN - Visit the CT DEP website to download the base map digital spatial data shown on this map.
