EXPLANATION

This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.9-meter (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat conditions as well as supporting identification and mapping of habitat features, train stations, and town boundaries. Important geographic facilities, facilities, train stations, and town boundaries. Important geographic features, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat features, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City. This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.9-meter (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat conditions as well as supporting identification and mapping of habitat features, train stations, and town boundaries. Important geographic features, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat features, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

MAPS AND DIGITAL DATA - All data is based on 1:24,000 scale and displays geographic names, places and facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.
