2008 Color Infrared Orthophoto
Plymouth, CT

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) extended orthophotography for the State of Connecticut. It is color infrared, leaf on, 1:39 foot (1 meter) aerial survey taken on July 3rd, 2008. 15th, 16th, and 17th. This extended orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identifications and monitoring of habitats and landscapes. The tonal quality of the extended orthophotography is an approximation and not exact. Differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street-level data, such as major intersections, US routes, state routes, minor, rail, and taxi cabs are displayed but may not match the locations of such features on the ground. Data sources include land use, towns, boroughs, school districts, institutions, hospitals, educational facilities, parks, residential areas, and more boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the National Agricultural Imagery Program (NAIP) for State of CT.
ROAD DATA - All data is based on 1:24,000 scale and displays geographic names, roads and their names, some boundaries, property, and locations. Road map data is subject to errors, corrections, and updates. Road data is based on the Federal Geographic Data Committee (FGDC).
NAIP AND CHROMATIC DATA - Sold by the CT DEP to produce digital maps and a variety of other products. Visit the CT DEP website to download the base map digital spatial data shown on this map.
