This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, 1:30,000 (1 meter) aerial survey taken on July 3rd, 1996, 11th, 13th, and 15th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat types. color differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street-level data such as major intersections, US routes, state routes, minories, railroads, and ferry crossings are displayed but may not match the locations of such features on the aerial photography. Also shown are airports, hospitals, educational facilities, rail stations, and more boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the State Imagery Program (SII) for the State of CT.

RAIL MAP DATA: All data is based on the 2000 US census and displays geographic names, places and their boundaries, towns, communities, parks, and schools. Every map data is neither current nor complete. Street data is from TeleAtlas, copyrighted data.

INTERSTATE HIGHWAYS: Cray, Inc, 2000. Interstate highways are shown in this map and a variety of other in PDF format. Visit the CT TRIP website to download the base map digital data shown on this map.
