This map displays 2008 National Agriculture Imagery Program (NAIP) color infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 15th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions, as well as supporting identification and mapping of habitats and land use. Differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street-level data such as major interstates, US routes, state routes, minor, railroads, andirty crosings are displayed but may not match the locations of such features on the base map data. Street-level data is based on TeleAtlas copyrighted data. Base map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data. BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and features, hospitals, educational facilities, town boundaries, airports and railroads. Base map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data. Important geographic locations and waterbodies are labeled. Protect from light and moisture. Map is not colorfast.
