This map displays 2008 National Agricultural Imagery Program (NAIP) color infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39-foot (1 meter) aerial survey taken on July 3rd, 10th, 11th, 15th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identifications and mappings of habitats. The color infrared orthophotography provides much information, but it is important to note that the differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data, such as major interstates, US routes, state routes, minor, railroads, and ferry crossings are displayed but may not match the locations of each feature on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

**DATA SOURCES**
- **ORTHOPHOTOGRAPHY**: National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Stillwater, MN.
- **BASE MAP DATA**: All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns, boundaries, airports, and railroads. Base map data is not colorfast. Street data is based on TeleAtlas copyrighted data.

**MAP PREPARED BY**: CT DEP, December 2010. Map is not colorfast. Printed under light and氨酸.
