This map displays 2008 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 16th, and 18th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identifications and mapping of land use, water bodies, and other objects. The range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Man-made objects such as major pipelines, US routes, state routes, railroads, and army corps structures are displayed but may not match the locations of such features on the data. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the United States Geological Survey (USGS) in 2008 and 2009.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is based on TeleAtlas propagated data.

MAP AND DIGITAL DATA - City or town name is color coded in the map and a variety of colors in PDF format. Visit the CT DEP website to download the base map digital orthophoto data shown on this map.
