EXPLANATION

This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken on July 5th, 10th, 11th, 15th, and 16th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting delineation and mapping of features within a geographic information system. Differences in range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection time. Measures such as major intersections, street names, state routes, minute railroad, and thirty cemeteries are displayed but may not match the location of such features on the ground. Features on the map include points of interest such as hospitals, educational facilities, race courses, and wet boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the Aerial Photography Field Office in West Lafayette, IL.

BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, places and their symbols, state boundaries, counties, and neighborhoods. Base map data is rendered current using complete, recent data sources from the USGS sexyfile cartography database.
